

Fashion your own Passion

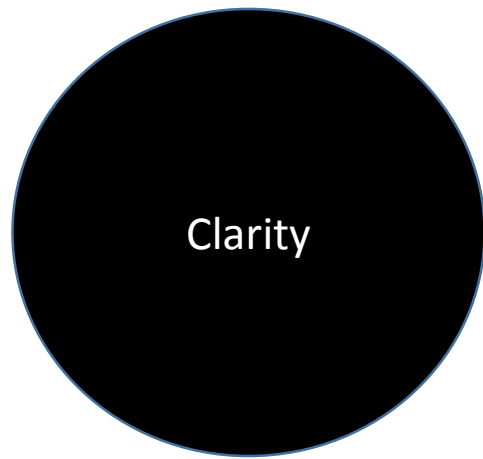

Module 1

Base Preparation

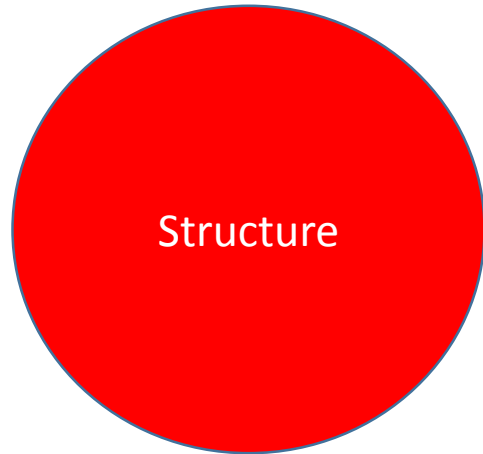

You have to ground yourself in practicality first before lifting off into new heights.

In this module I help you gain the following:

Clarity on what it is you actually want in terms of your dreams and business idea. Who you're going to sell to, where your profit's going to come from and how.

A structured plan of action that will help you get there. Including definition of the products or services that you'll sell. Making sure these products or services are positioned well enough for people to buy.

The ability to maximise your productivity, not just in creating your products or services but in building your business too. And I help you resolve the creativity killers such as self doubt and procrastination.

How it's delivered:

You get in touch, I send you a questionnaire. You fill it out, we get together on Skype or Telephone to work through your plan. You learn new things, and I document the plan for you to get started with your new business. Nice and easy.

2 Weeks it takes. Cost = £149
